

**Hi, I'm Climate Toothpaste.** I want to connect you with climate advocacy groups in your area. A lot of people are concerned about climate change, but feel overwhelmed by the problem, and they don't know where to turn. **Good news:** amazing groups are already working on solutions! I'm here to help you learn about these groups, so you can find a fit.

**Here's a text you can use to introduce yourself:**  
*I'm concerned about climate change and am learning how to be involved with climate solutions/carbon pricing initiatives/conservation. Can you tell me about your group and what you do?*

## MISSOURI

### Pricing Carbon

#### Citizens Climate Lobby

[www.citizensclimatelobby.org](http://www.citizensclimatelobby.org)

Citizens Climate Lobby is an international organization that is trying to pass legislation for a national carbon fee and dividend. What's missing from climate change? Political will. CCL creates that political will by educating about climate change. CCL has 4 branches in Missouri.

### Climate/Environment

[350.org](http://350.org)

[www.350.org](http://www.350.org)

A global grassroots climate movement that holds leaders accountable to the realities of science and the principles of justice. Through online campaigns, grassroots organizing, and mass public actions, 350 brings together a global network in over 188 countries. 350.org

might have two chapters in Missouri – one is in Kansas City.

### Climate/Environment/Conservation

#### Sierra Club

[missouri.chapter@sierraclub.org](mailto:missouri.chapter@sierraclub.org)

Protects wilderness, helped pass the Clean Air Act, the Clean Water Act, and the Endangered Species Act. Sierra Club wants to move away from the dirty fossil fuels that cause climate disruption and toward a clean energy economy. Sierra Club has four groups in Missouri.

### Climate Mobilization

#### The Climate Mobilization

[www.theclimatemobilization.org](http://www.theclimatemobilization.org)

Climate change presents us each with a fundamental choice. Will we be passive as civilization slowly collapses around us? Or will we mobilize and fight back for a 100% clean energy future? The Climate Mobilization believes we need a WWII-scale national mobilization to fight climate change.

#### Other national groups:
