

Hi, I'm Climate Toothpaste. I want to connect you with climate advocacy groups in your area. A lot of people are concerned about climate change, but feel overwhelmed by the problem, and they don't know where to turn. **Good news:** amazing groups are already working on solutions! I'm here to help you learn about these groups, so you can find a fit.

Here's a text you can use to introduce yourself:
I'm concerned about climate change and am learning how to be involved with climate solutions/ carbon pricing initiatives/conservation. Can you tell me about your group and what you do?

CALIFORNIA

California is ahead of the rest of the US, and most of the world, on climate policy. But there's still work to do, to make California's policy as strong as possible. Cap and trade is not enough.

Pricing Carbon

Citizens Climate Lobby
www.citizensclimatelobby.org

Citizens Climate Lobby is trying to pass legislation for a national carbon fee and dividend. What's missing from climate change? Political will. CCL creates that political will by educating about climate change. CCL has 11 CA chapters.

Climate/Environment

350.org www.350.org
 A global grassroots climate movement that

holds leaders accountable to the realities of science and the principles of justice. Through on-line campaigns, grassroots organizing, and mass public actions, 350 brings together a network in over 188 countries. 350.org has about 25 chapters in California.

Fracking

Californians Against Fracking
www.californiansagainstfracking.org
 Californians Against Fracking is a coalition working for a statewide ban on fracking and other dangerous extraction activities in California.

Fossil Fuel Cessation/Divestment

Fossil Free California www.fossilfreeca.org
 Dedicated to convincing public and private institutions, and individuals in CA to divest from fossil fuels: coal, oil, and gas. We urge immediate cessation of new investment in fossil fuel companies and complete divestment within 5 yrs.

Climate/Environment/Conservation

Sierra Club www.sierraclub/california
 Sierra Club's top California issues are climate change, drought and water management. We want to move away from dirty fossil fuels that cause climate disruption, toward a clean energy economy. Sierra Club has 12 chapters in CA.

Climate/Environment + Social Justice

California Environmental Justice Alliance
www.caleja.org
 Works to achieve environmental justice by advancing policy solutions. Unites and organizes members in communities most impacted by en-

vironmental hazards – low-income communities and communities of color.

Other CA groups: Environment California, Center for Climate Protection, Friends of the Earth, TheNextGeneration.org, Center for Biological Diversity, Greenpeace in CA.

Climate Mobilization

The Climate Mobilization
www.theclimatemobilization.org
 Climate change presents us each with a choice. Will we be passive as civilization slowly collapses around us? Or will we mobilize and fight back for a 100% clean energy future? The Climate Mobilization believes we need a WWII-scale national mobilization to fight climate change.
